Support Vitares first annual meeting! 27 February to 1 March, 2019

The congress will be held at the Conference Room c / o Tecnopolo - Building A (Third Floor)
Via Castel Romano, 100 - 00128 Rome

There are several ways to support research: our association has always organized courses and seminars, where we invited experienced scientists to share their knowledge and practical skills. All our events have been a great success: we are therefore more than ever motivated to offer further opportunities for meeting, training and confrontation between scientists.

Researchers of national and international fame will join our first annual meeting, delivering talks about their work in prominent research fields. We will address a variety of topics, ranging from pre-clinical models for cancer research to cancer immunotherapy, to veterinary medicine and vaccinology platforms for cancer and infectious diseases. Our guiding principle is always the value of translational research and One Health approach: human and veterinary medicine, pre-clinical and clinical studies, together contribute to the advancement of therapeutic solutions and healthcare for both men and animals.

The communication and sharing of scientific knowledge is as important as the lab work. This meeting is a chance especially for young researchers to exchange ideas and confront with experts in the field. This is why we ask for your support: we want everyone to get the opportunity to attend the meeting, participate in the debates and develop their own ideas. This is a way of helping science.

Registration Fees

- Free for Staff and VITARES members in good standing
- 120,00 Euro for the other participants
